What Does the Bible Say

In these days of many war stories, Mr. Johnson's new novel comes as a

owen Johnson ("Virtuous Wives"; Little, Brown & Co.)

It is a high tribute to Mr. Johnson's art to say that he succeeds in making even such creatures interesting. He makes a curious contradiction in the opening scene. He suggests what women are in the habit of choosing thinrs with their hands, and he now and then overworks some of the stock phrases of the day. But on the whole he has produced an exceptionally well written and brilliant story, concerning which we can only regret that it is not about more attractive people.

Fighting and Love Making

THE TANG OF LIFE. By Henry Herbert Knibbs With illustrations by E. Boyd Smith. 12mo, pp 394. The Houghton Mifflin Company. The Houshton Mintin Company.

The tang of life is in wild adventure in the great Southwest, where passions rage high and free and men make love to women and shoot their fellow men with equal zest. Amid it all there are loyalty, purity, chivalry and the fine characteristics which are no stranger in elemental than in the most sophisticated life. We have had much of this class of fletien in letter are least of the least of

characteristics which are not characteristics which are not cated life. We have had much of this class of fiction in late years, but we shall not complain of a surfeit so long as works come to hand as interesting and as well written as this.

JAMESIE By Ethel Sidgwick. 12mo. pp. 538.
Small, Maynari & Co.

We call this a sequel to "Hatchways," though it is not professedly
that, for it presents some of the same
characters, eight years later. "Other
times, other manners." In "Hatchways" there was no hint of the war.
In "Jamesie" the influence of the war
is incersantly felt, subjectively and objectively; although it is not a "war
novel." But every tale of English life
since 1914 must have the war for a
background. What does figure largely
is the perennial "Irish question," in
one of its latest and most violent
phases. But in dealing with it as with
the great war itself Miss Sidgwick is
a'ways admirably restrained and judicious.

A peculiarity of the work is that it consists almost entirely of letters and other documents, or parts of them, and citations of conversations. There is no narrative whatever in the usual sense of the term. To relate a romance in such fashion was a daring undertaking, but Miss Sidgwick has achieved it with triumphant skill. The whole work is intensely human, the greatest interests of the world being made to serve merely as background and scenery for the doings of the little company of people about whom the book is written. The same power of character drawing that has been evident in her former works is finely visible here; exercised as successfully through the words of the people themselves as it could be through an author's narrative and description. It is a work of fascinating charm. But these two American engineers must have the chief credit for placing an effective navy beneath the surface of the sea, just as American inventors have the credit for making practical "the nations' airy navies."

Mr. Lake tells a plain, straightforward tale in this book about the earlier attempts at submerged navigation, about Mr. Holland's work in that direction and about his own devices. Naturally, he pays most attention to the

The Rise of Rome

From the Founding of the City tion and about his own devices. Naturally, he pays most attention to the use of the submarine in war, but he does not ignore its immense potential utility in peace. His volume goes into technicalities sufficiently to be informing to the professional engineer and navigator, but not enough to repel the lay reader, who will find the narrative and descriptions of fascinating interest. A multitude of admirable illustrations add to the value of this important and authoritative work. to the Death of Cæsar

HISTORY OF LONG ISLAND. By Benjamin F. Thompson. Hustrated. Third edition, greatly enlarged, with a blography of the author by Charles 1. Werner. Three volumes, 8vo, pp. 1, 538, 649, 671. Robert H. Dodd.

scope as to strike the average reader with despair. We know not what Mr. Boffin thought of it under the spell of Mr. Wegg's lucid recitals, but we know that several of the great histories of Rome have been sealed books to all but a few, because of their portentous voluminousness. But here we have the history of that marvellous seven hundered years from Romulus to Caesar told in a volume which you may hold in your hand or carry in your pocket, and told with sufficient fulness for all save student investigators, and with a dearm of style which attracts the attention and holds unflagging interest.

It is pleasant to observe that the historiaris's sense of proportion acts in coordination with the ascertainment of a facts. Thus the period of the Roman I kings is disposed of in a single brief chapter; not because it was not important than is commonly supposed-but because so little is positively known about it. There are legends this work does not concern itself with prolix repititions of and speculations upon them. But of the later centuries it is one of the second volume as the completion of what will probably long rank as the standard history of George Chrystal, who translated the completion of what will probably long rank as the standard history of George Chrystal, who translated the book from the Italian. His work is so superbly done that we are never reminded that it is a translation, but read on and on as though it were an original composition of graceful and classic English.

A Ballplayer at the Front

We should hate to say how long ago it was when we were first delighted with the story of the Tar Baby, and we should hesitate to estimate how often we have been delighted with the other adventures of Brer Rabbit and the rest in all the many years down to this farewell sheaf of tales from Mr. Harris's facile but never failing and These letast are worthy of rest.

A Ballplayer at the Front

A Ballplayer at the Front

FROM BASSBAIL TO BOCHES By H. C. With the control of the serious observation and food for thought. It is one thing to write a sook thus, in the breezy colloquialism — euphemism for slang—of the day; it is another and vastly harder thing to write it from the point of view which the user of such talk would naturally occupy. Both these things, however, Mr. Witwer does excellently well, and thus produces a book which will be read with much delight and with no little profit.

New York Times—"Mr. Norris proves in this novel that his kinship to his famous elder brother, Frank Norris, is more than physical. For he shows that he possesses the other's ability to tell a story and to envisage in its scope wide and graphic views of society and vivid character portrayal. As a novel, it is a good story, worth reading by any one who likes fiction of high grade.
